1. There are 16 to 20 bunkers which are used by the Czechoslovak armed forces as ammunition dumps in the forest near Medlanky (49 19 N - 16 35 E), Czechoslovakia. The bunkers date from World War I. Each bunker is separately fenced in and guarded by one soldier. Each is connected by phone with the guardroom. The man in charge of the bunkers lives near the installation. The guard detail consists of one officer and 30 men. The soldiers on duty stay in the guardroom, which is situated on the side of the road at the end of the row of bunkers in the direction of Medlanky. Bunkers are located on both sides of the road. Civilian traffic on the road is not subjected to any security measures.
2. In 1951 the ammunition dump was used by the 31st Infantry Regiment. At that time various kinds of grenades and small bombs were stored there.
